FOREWORD

This publication is produced by the Missouri State Highway Patrol, Statistical Analysis Center. It is intended to provide a basic understanding of Missouri crime problems, their characteristics, and the law enforcement actions being taken to address these.

The Missouri State Highway Patrol assumed management of the Missouri Uniform Crime Reporting (UCR) Program in 2001. It is the responsibilities of the UCR Program to collect, maintain, and ensure the integrity of Missouri UCR crime statistics. In addition, the Missouri UCR Program is responsible for reporting monthly crime statistics to the Federal Bureau of Investigation, National Uniform Crime Reporting Program. This report is produced annually to document crime activity reported to these programs.

I encourage all criminal justice and other public officials to review this publication. If additional research or statistical information services about Missouri's crime totals are needed, please contact the Statistical Analysis Center for assistance.

ACKNOWLEDGMENT

The Missouri Uniform Crime Reporting (UCR) Program has worked with Missouri law enforcement agencies to meet mandatory reporting compliance as mandated by Section 43.505 RSMo. The direction and efforts of Missouri UCR Program Director Kyle Comer and staff of the Missouri UCR Program are instrumental to the Program's success. Without the efforts by the Missouri State Highway Patrol, Information and Communications Technology Division, this report would not have been possible. Financial support provided by the Missouri Department of Public Safety to the Statistical Analysis Center and the Missouri UCR Program to administer UCR data collection is also appreciated.

Missouri law enforcement agencies that submit crime and employment information to the Missouri UCR Program play a critical role in development of this report. Their participation in the program is indicative of their desire to improve Missouri's law enforcement information capabilities.

Over the past years, the U.S. Department of Justice, Bureau of Justice Statistics has supported, through grant funds, the Missouri SAC's efforts to provide publications like *Crime in Missouri* and other information services to the Missouri criminal justice community. Their financial support and technical assistance are appreciated.

EXECUTIVE SUMMARY

This digest is produced annually by the Missouri State Highway Patrol (MSHP) Statistical Analysis Center (SAC). Prior to 2001, the primary source of data was from law enforcement agencies who voluntarily submitted crime statistics to the Federal Bureau of Investigation (FBI), National Uniform Crime Reporting Program (UCR). As of 2001, Missouri law enforcement agencies have been required by statute to submit their crime statistics to the Missouri UCR Program.

The Crime Index is the sum of eight major offenses and is used to measure the magnitude of crime in the United States. Only eight major offenses are included in the Index because of their frequency of occurrence and the fact they are most likely to be reported to law enforcement agencies. These Index offenses are: murder, forcible rape, robbery, aggravated assault, burglary, larceny / theft, motor vehicle theft, and arson. The first four make up the Violent Crime Index, and the last four make up the Property Crime Index.

In 2012, 228,012 Crime Index offenses were reported in the state of Missouri. In 2012, one Index crime was committed every 2.3 minutes. In 25.1 of every 100 Crime Index offenses, the cases were cleared by arrest or exceptional means.

Violent Crime Index

Violent offenses made up 11.9 percent of the total 2012 Missouri Crime Index. There were 27,139 Violent Index offenses reported in 2012. - 1,510 forcible rapes were reported in 2012. Forcible rape accounted for 0.7 percent of the total 2012 Missouri Crime Index. One forcible rape was committed every 5.8 hours. In 53.0 percent of every 100 forcible rapes, the cases were cleared by arrest or exceptional means.

INTRODUCTION

This publication prepared by the Missouri State Highway Patrol (MSHP), Statistical Analysis Center (SAC), is designed to present data on crime and arrest activity in Missouri from 2003 through 2012 with special emphasis on the most recent year of crime and arrest activity.

The crime and arrest data in this publication are segmented into eleven parts:

- Section 1 displays the Missouri Crime Clock. This clock offers an overview of the frequency of occurrence of Crime Index offenses committed in the state in relation to time. The Crime Index is the sum of the eight major offenses used to indicate the occurrence of crime in the United States. The eight offenses making up the total Crime Index are: murder, forcible rape, robbery, aggravated assault, burglary, motor vehicle theft, larceny / theft, and arson.
- Section 2 provides data related to Crime Index offenses committed in the state of Missouri. Its purpose is to provide a comparison of the various types of Crime Index offenses so their relative importance can be assessed. In addition, Crime Index activity is displayed by geographical regions of the state and also over time to observe trends.
- Section 3 presents data on arrest activity and clearance rates associated with Crime Index offenses as well as arrest activity associated with other classes of criminal offenses. These data describe criminal enforcement activity being performed in the state by crime type.
- Section 4 provides a series of data and analysis related to each of the eight types of Crime Index offenses. Data are provided on crime activity, clearance rates, crime patterns, and arrest activity associated with each of these offenses.

Eight offenses make up the Crime Index. They are:

- *Murder*
- *Rape*
- *Robbery*
- *Aggravated Assault*
- *Burglary*
- *Larceny / Theft*
- *Motor Vehicle Theft*
- *Arson*

- Section 5 provides summary data on domestic violence incidents committed in Missouri and identifies relationships between domestic violence victims and offenders.
- Section 6 provides summary data on Crime Index offenses and arrest activity for specific political subdivisions in the state.
- Section 7 provides summary data on law enforcement officers killed while on duty.
- Section 8 provides summary data on law enforcement officers assaulted while on duty.
- Section 9 provides uniformed and civilian employment information for Missouri law enforcement agencies.
- Section 10 provides data on law enforcement employees as well as the number of assaults on sworn personnel for specific political subdivisions in the state.
- Section 11 identifies the number and characteristics of 2012 hate crimes in Missouri. Trends of these crimes from 2010 through 2012 are also analyzed in Section 11.

Prior to 2001, data in this Digest were provided on a voluntary basis by Missouri law enforcement agencies to the Federal Bureau of Investigation (FBI) National Uniform Crime Reporting (UCR) Program. In 2001, Section 43.505 of the Revised Statutes of Missouri was enacted requiring Missouri law enforcement agencies to report their UCR crime statistics to the Missouri UCR Program administered by the Missouri State Highway Patrol.

The national UCR Program was initiated in 1930 by the Committee on Uniform Crime Reports of the International Association of Chiefs of Police (IACP). This committee developed uniform offense and arrest classifications as well as reporting procedures which could be used by law enforcement agencies throughout the nation. The FBI was designated to administer the program and became the national clearinghouse for UCR data. The Committee on Uniform Crime Reports of the IACP continues to serve the national Program

in an advisory capacity. In 1966, the National Sheriffs' Association also established a Committee on Uniform Crime Reports to act as an advisory body for this program and to promote reporting to the UCR Program.

Crime and arrest data are collected on a monthly basis by several methods in Missouri. Missouri law enforcement agencies report their crime activity on a web-based UCR reporting application. After entry, data from all Missouri law enforcement agencies are moved to a central data repository maintained by the MSHP.

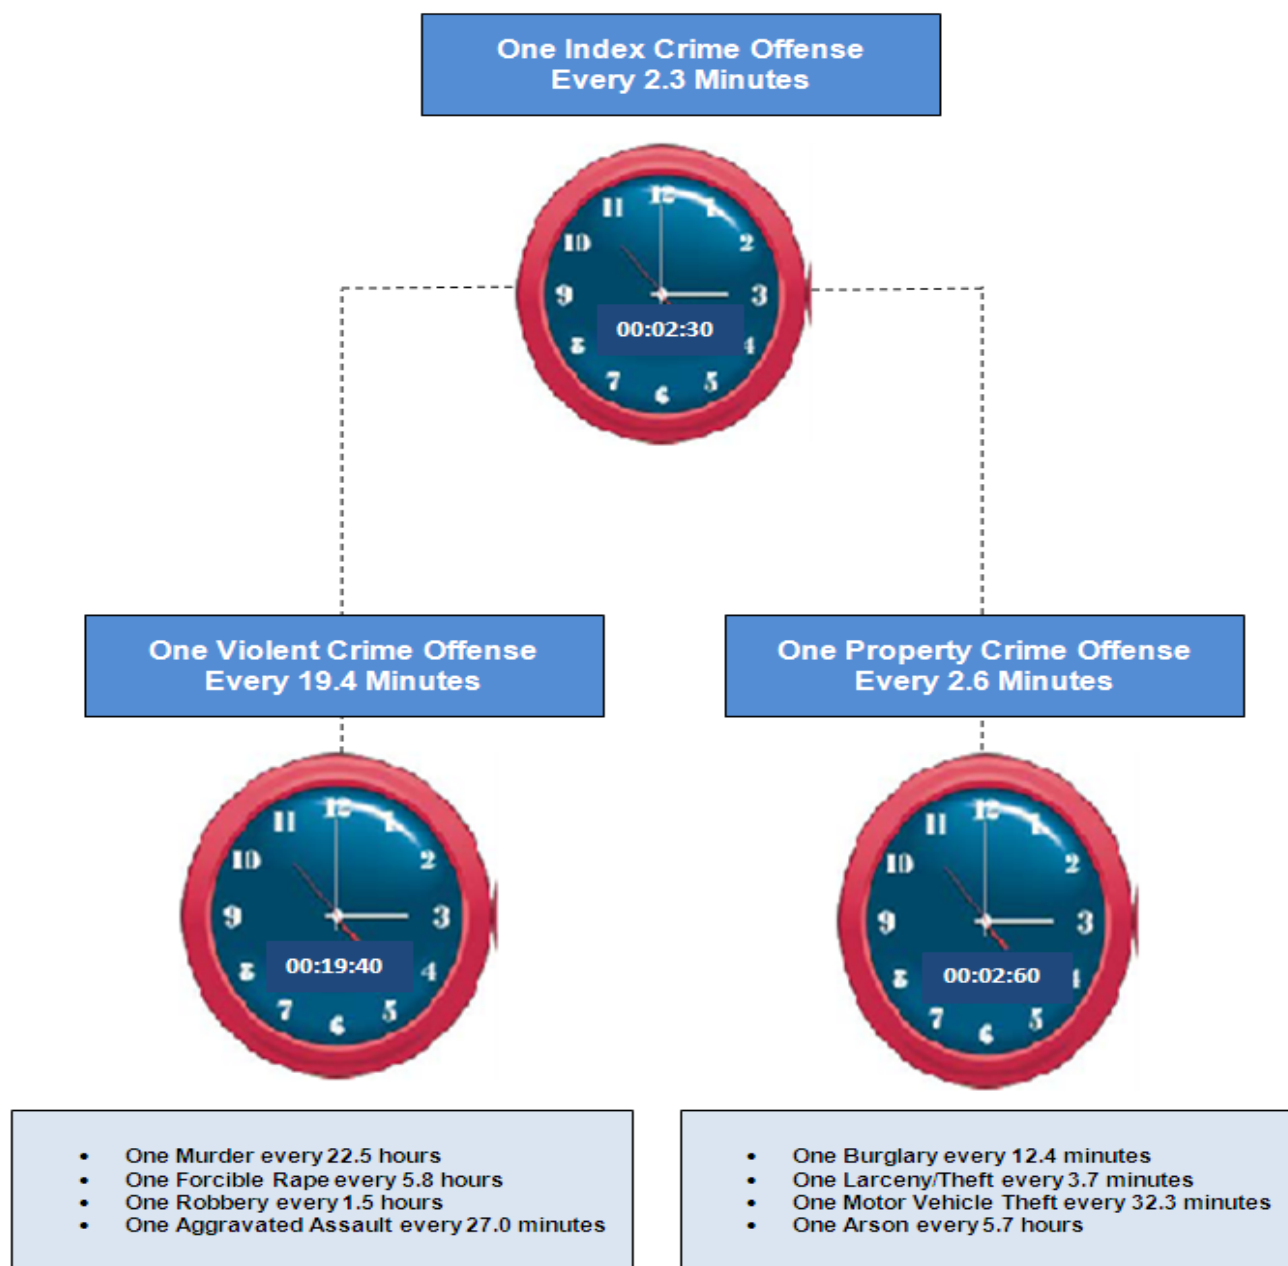

Data presented in this report identify crime and arrest activity in specific political subdivisions as reported to the Missouri UCR Program. It is important to note that statistics for a political subdivision include not only crime and arrest activity reported by a local law enforcement agency, but also crime and arrest activity reported by state agencies (e.g., MSHP, Department of Conservation).

Slight discrepancies may be found if comparisons are made with FBI UCR publications and this digest covering the same subject matter for the state of Missouri. Discrepancies may be noted when examining actual reported figures. This is a result of updates having been made to UCR files between the time the FBI data were processed and the time the SAC analysis was performed. This report is merely a snapshot of crime summary data reported to the Missouri UCR Program. Law enforcement agencies continually update their UCR data for a variety of reasons. Some Missouri law enforcement agencies report to the Missouri Incident Reporting System (MIBRS) instead of the UCR Summary Program. These incident data are aggregated strictly by UCR hierarchical rule while the FBI aggregates NIBRS data on less strict UCR hierarchical rules. These different data aggregation methods can cause some discrepancies between national and state UCR statistics. For this reason, statistics in this report may be different than statistics obtained from other sources or reports.

1.0 MISSOURI CRIME CLOCK

The Missouri crime clocks summarize criminal activity in the state during 2012 in relation to time. From this perspective, an appreciation of the relative frequency of various criminal offenses can be obtained. These clocks should be viewed with care. They are designed to convey annual crime experience by showing the relative frequency of occurrence of the Index offenses. This mode of display should not be taken to imply regularity in the commission of crime. Rather, crime clocks represent the annual ratio of crime to fixed time interval.

2.0 MISSOURI CRIME INDEX COMPARISON ANALYSIS

A series of tables and figures summarizes crime index offenses committed in the state of Missouri. The purpose of these displays is to compare the various types of Crime Index offenses being committed according to their relative contribution to the crime index. In addition, Crime Index offense rates are displayed by geographic regions of the state, and over time to identify trends.

3.0 MISSOURI ARREST ANALYSIS

A series of tables and figures summarizes Missouri crime index arrest clearance rates, actual arrest activity associated with crime index offenses, and arrest activity associated with all other classes of criminal activity reported to the UCR Program. The purpose of these displays is to provide an overview of criminal enforcement activity being performed in the state by class of crime. In addition, arrest rates are displayed over time to observe trends.

4.2 FORCIBLE RAPE

DEFINITION

In 2012 and prior years, the FBI, Uniform Crime Reporting Program, defined forcible rape as the carnal knowledge of a female forcibly and against her will. Assaults or attempts to commit rape by force or threat of force were also included in this definition. However, statutory rape (without force), sex attacks on males, and other types of sex offenses were not included in this category. In 2013, the FBI, Uniform Crime Reporting Program, definition of forcible rape was modified to include forcible carnal knowledge of male victims. This definition change may result in an increase in forcible rapes in 2013 and make comparisons of data from 2013 to previous years difficult to interpret. In all years, forcible rapes are reported on a per victim basis.

2012 Summary

- *1,510 rapes were reported in 2012.*
- *One rape occurred every 5.8 hours.*
- *Rape accounted for 0.7 percent of the Total Crime Index and 5.5 percent of all Violent Index offenses.*
- *The rape rate per 100,000 population was 25.0.*
- *Rape by force constituted 92.3 percent of all rapes while attempted rape accounted for 7.7 percent.*
- *In 2012, 53.0 percent of all rapes were cleared by arrest or exceptional means.*
- *363 persons were reported arrested for rape. Of those, 85.7 percent were adults.*

FORCIBLE RAPE SUMMARY: 2011 and 2012

- Forcible rape offenses increased 3.6% between 2011 and 2012.

6.0 MISSOURI COUNTY AND CITY CRIME AND ARREST ANALYSIS

A series of tables summarizes crime index offenses and arrest activity associated with law enforcement jurisdictions in the state of Missouri. These data displays provide an overview of the extent of the crime problem within Missouri communities.

Population figures in this section are estimates based on the last census taken by the U.S. Census Bureau and represent the population associated with the reporting agency's jurisdiction. For rural counties, the figures represent the jurisdiction normally covered by sheriffs' departments and/or county police departments. Crime and arrest activity reported by state law enforcement agencies is included in statistics of the jurisdiction where the crime or arrest occurred. County population figures are computed by subtracting the population of all incorporated municipalities within a county having their own law enforcement agencies from the total population of the county.

6.1 MISSOURI POLITICAL SUBDIVISION INDEX CRIME ANALYSIS

A series of tables summarizes 2012 Crime Index offenses and arrests for all political subdivisions in Missouri. These tables display statistics for each Index crime and rates per 100,000 population. Index crime totals are also provided for all Missouri counties.

10.0 MISSOURI LAW ENFORCEMENT AGENCY EMPLOYMENT / ASSAULT ANALYSIS

A series of tables summarizes the number of law enforcement employees, as well as assaults on sworn personnel associated with law enforcement jurisdictions reporting to Missouri's Uniform Crime Reporting Program. Data displays provide an overview of law enforcement personnel resources and the problem of officer assaults within Missouri communities.

10.1 MISSOURI LAW ENFORCEMENT AGENCY

EMPLOYMENT / ASSAULT ANALYSIS

Officer assaults are defined as the unlawful attack by a person on a law enforcement officer in the performance of their duty. Officer assaults include those which result in serious injury to the sworn officer, all assaults in which the assailant used a weapon which could have caused serious injury or death, and assaults on officers beyond mere verbal abuse or minor resistance to an arrest. Assaults resulting in the death of a law enforcement officer are not included, but can be found in Section 8.0 of this report.

Employment information reflects a count of full-time sworn officers with full arrest powers and civilian employees the agency has on its payroll as of October 31 of each reporting year. It does not include part-time employees or auxiliary officers.

Population figures in this section are estimates based on the last census taken by the U.S. Census Bureau and represent the population associated with the reporting agency's jurisdiction. For rural counties, the figures represent the jurisdiction normally covered by sheriff's departments and/or county police departments. These population figures are computed by subtracting the population of all incorporated municipalities within a county having their own law enforcement agencies from the total population of the county.

2012 Summary

- *Law enforcement agencies reported 19,951 persons employed on a full-time basis in 2012.*
- *In 2012, there were 14,304 full-time officers in Missouri.*
- *There were 2.4 sworn officers per 1,000 population in 2012.*

GLOSSARY

GLOSSARY

ADULT: A person 18 years of age or older.

ARREST: Taking into physical or other legal custody for committing an offense in the local reporting jurisdiction. Arrests for all criminal offenses are scored. Arrests for ordinance violations are included. Arrests for traffic offenses, with the exception of driving under the influence of intoxicants and arrests in connection with negligent manslaughter in traffic crashes are not scored. Included are those persons arrested but released without being formally charged.

ASSAULT: Officer assaults are defined as any unlawful attack by a person on a law enforcement officer who is in the performance of their duty. Officer assaults include those which result in serious injury to the sworn officer, all assaults in which the assailant used a weapon which could have caused serious injury or death, and assaults on officers that were beyond mere verbal abuse or minor resistance to an arrest.

ASSAULTS PER 100 OFFICERS RATE: This rate is an indicator of reported officer assault activity standardized by the number of officers employed by the agencies reporting the activity. The officer assault rate formula is:

$$\frac{\text{Number of Officer Assaults} \times 100}{\text{Number of Law Enforcement Officers Employed}}$$

Prior to 2001, assaults per 100 officers were based on estimates from data of agencies reporting a full 12 months of officer assault activity. Since 2001, this rate is based on officer assault activity reported to the Missouri UCR Program.

ASSIGNMENT: These categories identify the specific assignment of an officer at the time of the assault. Two-Man Vehicle and One-Man Vehicle pertain to uniformed officers on patrol. Special assignment pertains to those non-uniformed officers functioning as detectives or on special assignment. Other Assignment pertains to those officers assaulted while functioning in some other capacity, such as foot patrol, off-duty, etc. The term "assisted" refers to law enforcement assistance only.

CLEARANCE: The resolution of a criminal offense or an assault on an officer by the arrest, charging, and turning over to the court for prosecution one or more persons alleged to have committed a crime or assault on an officer. An offense can also be cleared by exceptional means when the law enforcement agency has: 1) established the identity of the offender, 2) has enough information to support an arrest, charge, and prosecution in court, 3) the exact location of the offender is known so that they could be taken into custody, and 4) there is some reason outside law enforcement control that precludes arresting, charging, and prosecuting the offender (ex., offender dies).

CLEARED OFFENSES ONLY JUVENILES: The number of clearances for an offense in which only juveniles were arrested or were identified as the offender but, for some valid reason, could not be arrested divided by the total number of clearances for that offense expressed as a percentage. The formula is:

$$\frac{\text{Number of Offenses Cleared Involving Only Juveniles}}{\text{Number of Clearances}} \times 100$$

CLEARANCE RATE (Assault on an Officer): The number of clearances divided by the total number of assaults, expressed as a percentage. The formula is:

$$\frac{\text{Number of Clearances}}{\text{Number of Assaults}} \times 100$$

CLEARANCE RATES (Offenses): The number of clearances divided by the total number of offenses, expressed as a percentage. The formula is:

$$\frac{\text{Number of Clearances}}{\text{Number of Offenses}} \times 100$$

CRIME INDEX: The Crime Index is the sum of the eight major offenses used to indicate the occurrence of crime in the United States. They were selected because of their frequency of occurrence and because they are most likely to be reported to a law enforcement agency. The eight offenses are: murder, forcible rape, robbery, aggravated assault, burglary, larceny / theft, motor vehicle theft, and arson. The first four make up the Violent Crime Index and the last four make up the Property Crime Index. Definitions of each of the offenses making up the Crime Index are provided in the section entitled "Missouri Detail Crime Index Analysis". In addition, refer to Crime Index Offense in this section for an explanation of how each type of offense is reported to the UCR Program.

CRIME INDEX OFFENSE: In the UCR Program, the offenses of murder, forcible rape, and aggravated assault are crimes against persons. For these crimes, one offense is counted for each victim. Robbery, burglary, larceny / theft, motor vehicle theft, and arson are crimes against property. For these crimes, with the exception of motor vehicle theft, one offense is counted for each distinct operation. In the case of motor vehicle theft, one offense is counted for each stolen vehicle.

CRIME INDEX OFFENSE ESTIMATES: Estimation routines were used in the digest to identify the actual number of index crimes occurring in the state on an annual basis. They are designed to compensate for non-reporting and incomplete reporting of such offenses by Missouri law enforcement agencies. The following procedures and formulas were used to obtain statewide crime index offense estimates:

- Law enforcement agencies in the state of Missouri were categorized into groups. The following categories were used:

Municipal agency - 250,000 and over
Municipal agency - population 100,000 - 249,99
Municipal agency - population 50,000 - 99,999

Municipal agency - population 25,000 - 49,999
 Municipal agency - population 10,000 - 24,999
 Municipal agency - population 2,500 - 9,999
 Municipal agency - population under 2,500
 Rural Sheriff's Department
 Suburban Sheriff's Department and County Police

- For those law enforcement agencies within a group reporting six months or more, a yearly estimate of their crime index offenses was obtained using the following formula:

$$\frac{\text{Crime Index Offenses Reported}}{\text{No. of Months Reported}} \times 12 = \text{Yearly Crime Index Offenses}$$

- For each group, the yearly crime index offenses for all law enforcement agencies reporting six months or more and their jurisdiction's population were summed and the following group crime index rate was computed.

$$\frac{\text{Sum of Rpt. Agency's Yearly Crime Index Offenses}}{\text{Sum of Rpt. Agency's Population}} = \text{Group Crime Index Rate}$$

- For those law enforcement agencies reporting less than six months or no activity at all within a group, their yearly crime index offenses were computed using the following formula:

$$\frac{\text{Law Enforcement Agency Population}}{\text{Group Crime Index Rate}} = \text{Yearly Crime Index Offenses}$$

- Yearly crime index offenses computed above for all Missouri law enforcement agencies were then summed in order to obtain a statewide yearly crime index offense estimate for use in this digest.

No estimation routines were used in data displays identifying specific law enforcement agencies' yearly crime activity in the digest. In these data displays, only crime activity reported to the UCR Program is displayed.

EMPLOYMENT: The number of persons, either sworn officers with full arrest powers or civilians working in a full-time capacity and appearing on the payroll of a Missouri law enforcement agency as of October 31 of a reporting year.

HATE CRIME: A criminal offense committed against persons, property, or society which is motivated, in whole or part, by the offender's bias against race, religion, disability, sexual orientation, or ethnicity / national origin. Hate crimes are reported to the Missouri UCR Program when an offender's bias is associated with murder, forcible rape, aggravated assault, simple assault, intimidation, robbery, burglary, larceny / theft, motor vehicle theft, arson, and property damage / vandalism.

INDEX CRIMES: Index Crimes are the eight major offenses used to indicate the occurrence of crime in the United States. They were selected due to their frequency of occurrence and because they are most likely to be reported to a law enforcement agency. The eight offenses are: murder, forcible rape, robbery, aggravated assault, burglary, larceny / theft, motor vehicle theft, and arson.

INDEX CRIMES PER OFFICER RATE: This rate indicates the number of index crime incidents in a community in relation to the law enforcement agency's sworn officer resource availability. The formula is:

$$\frac{\text{Number of Index Crimes}}{\text{Number of Law Enforcement Officers Employed}}$$

JUVENILE: A person under 18 years of age.

JUVENILE ARREST: Juvenile arrests do not include law enforcement contacts with juveniles where no offense has been committed. Juveniles taken into custody for their own protection, such as in neglect cases, are not scored since they have not committed any crime.

OFFICERS PER 1,000 POPULATION RATE: This rate is an indicator of a law enforcement agency's sworn officer resource availability in relation to the population of the community it serves. The formula is:

$$\frac{\text{Number of Officers Employed} \times 1,000}{\text{Community Population}}$$

PERCENT CHANGE: The formula is:

$$\frac{\text{Value in Current Period} - \text{Value in Base Period}}{\text{Value in Base Period}} \times 100$$

POPULATION: Total number of persons residing in a jurisdiction based on United States Census data.

QUARTILE: The value marking the boundary between two consecutive intervals in a frequency distribution of four intervals with each containing one quarter of the total population.

RATE PER 100,000 POPULATION: Rates per 100,000 population are indicators of activity standardized by the population of those law enforcement agencies associated with the activity. Three types of rates are provided: statewide crime index offense rates, reporting agency crime index offense rates, and arrest rates.

The statewide offense rate formula is:

$$\frac{\text{Number of Offenses Reported} \times 100,000}{\text{Population of all Agencies Reporting}}$$

The reporting agency offense rate formula is:

$$\frac{\text{Number of Offenses Reported} \times 100,000}{\text{Population of Reporting Agency(ies)}}$$

The arrest rate formula is:

$$\frac{\text{Number of Arrests Reported} \times 100,000}{\text{Population of Reporting Agency(ies)}}$$

STRONG ARMED ROBBERY: A robbery wherein no weapons were used but tactics (limited to the use of personal weapons such as hands, arms, feet, fists, teeth, etc.) were employed to deprive the victim of their property.

TIME SERIES: Time series analysis was used in the digest to forecast future crime and arrest activity. With this technique, data for past periods were used as the basis for projecting levels of future activity. Ten years of past data were used to make these projections.

Crime and arrest rates on a per 100,000 population basis were used in making the forecasts. These rates reflect crime and arrest activity in relation to population.

The technique used to project crime and arrest activity was Exponential Smoothing (available through the SAS Econometrics and Time Series software package). Use of this technique took into consideration the limited number of data points in the time series, as well as whether or not the time series was best characterized as constant, linear, or non-linear. In applying the smoothing technique, greater weight was given to the more recent data values than to the earlier data values when projecting future levels of activity.
